Dear Hiring Manager,

I am writing to express my interest in opportunities within your esteemed organization, where I can leverage my expertise as a Java Backend Engineer with over 4 years of experience in enterprise application development. My recent role at DGLiger Consulting has equipped me with the skills to engineer secure, scalable banking applications, and I am eager to contribute to innovative projects that drive digital transformation.

Throughout my career, I have successfully implemented OAuth 2.0-based solutions, enhanced application security, and led the development of critical systems that streamline operations and ensure regulatory compliance. My technical proficiency in Java, Spring Boot, and cloud technologies, combined with my commitment to delivering high-quality solutions, has been recognized through multiple awards and appreciation from clients.

I am particularly drawn to roles that challenge my problem-solving abilities and allow me to work collaboratively within dynamic teams. I am confident that my background in backend architecture and application lifecycle management will enable me to make a meaningful impact in your organization.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with your needs.

Sincerely,
Avinash Dubey
